APPLICATION PERMISSIONS

PERMISSION	STATUS	INFO	DESCRIPTION
com.mobile.halifax.permission.DEEP_LINK	unknown	Unknown permission	Unknown permission from android reference

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.CALL_PHONE	dangerous	directly call phone numbers	Allows the application to call phone numbers without your intervention. Malicious applications may cause unexpected calls on your phone bill. Note that this does not allow the application to call emergency numbers.
android.permission.INTERNET	normal	full Internet access	Allows an application to create network sockets.
android.permission.USE_FINGERPRINT	normal	allow use of fingerprint	This constant was deprecated in API level 28. Applications should request USE_BIOMETRIC instead.
android.permission.USE_BIOMETRIC	normal	allows use of device-supported biometric modalities.	Allows an app to use device supported biometric modalities.
android.permission.READ_CONTACTS	dangerous	read contact data	Allows an application to read all of the contact (address) data stored on your phone. Malicious applications can use this to send your data to other people.
android.permission.WRITE_EXTERNAL_STORAGE	dangerous	read/modify/delete external storage contents	Allows an application to write to external storage.
android.permission.CAMERA	dangerous	take pictures and videos	Allows application to take pictures and videos with the camera. This allows the application to collect images that the camera is seeing at any time.
android.permission.READ_EXTERNAL_STORAGE	dangerous	read external storage contents	Allows an application to read from external storage.
android.permission.VIBRATE	normal	control vibrator	Allows the application to control the vibrator.
android.permission.ACCESS_WIFI_STATE	normal	view Wi-Fi status	Allows an application to view the information about the status of Wi-Fi.

PERMISSION	STATUS	INFO	DESCRIPTION
android.permission.ACCESS_NETWORK_STATE	normal	view network status	Allows an application to view the status of all networks.
android.permission.ACCESS_FINE_LOCATION	dangerous	fine (GPS) location	Access fine location sources, such as the Global Positioning System on the phone, where available. Malicious applications can use this to determine where you are and may consume additional battery power.
android.permission.RECEIVE_BOOT_COMPLETED	normal	automatically start at boot	Allows an application to start itself as soon as the system has finished booting. This can make it take longer to start the phone and allow the application to slow down the overall phone by always running.
android.permission.WAKE_LOCK	normal	prevent phone from sleeping	Allows an application to prevent the phone from going to sleep.
com.google.android.finsky.permission.BIND_GET_INSTALL_REFERRER_SERVICE	normal	permission defined by google	A custom permission defined by Google.
com.google.android.c2dm.permission.RECEIVE	normal	recieve push notifications	Allows an application to receive push notifications from cloud.
com.sec.android.provider.badge.permission.READ	normal	show notification count on app	Show notification count or badge on application launch icon for samsung phones.
com.sec.android.provider.badge.permission.WRITE	normal	show notification count on app	Show notification count or badge on application launch icon for samsung phones.
com.htc.launcher.permission.READ_SETTINGS	normal	show notification count on app	Show notification count or badge on application launch icon for htc phones.
com.htc.launcher.permission.UPDATE_SHORTCUT	normal	show notification count on app	Show notification count or badge on application launch icon for htc phones.

PERMISSION	STATUS	INFO	DESCRIPTION
com.sonyericsson.home.permission.BROADCAST_BADGE	normal	show notification count on app	Show notification count or badge on application launch icon for sony phones.
com.sonymobile.home.permission.PROVIDER_INSERT_BADGE	normal	show notification count on app	Show notification count or badge on application launch icon for sony phones.
com.anddoes.launcher.permission.UPDATE_COUNT	normal	show notification count on app	Show notification count or badge on application launch icon for apex.
com.majeur.launcher.permission.UPDATE_BADGE	normal	show notification count on app	Show notification count or badge on application launch icon for solid.
com.huawei.android.launcher.permission.CHANGE_BADGE	normal	show notification count on app	Show notification count or badge on application launch icon for huawei phones.
com.huawei.android.launcher.permission.READ_SETTINGS	normal	show notification count on app	Show notification count or badge on application launch icon for huawei phones.
com.huawei.android.launcher.permission.WRITE_SETTINGS	normal	show notification count on app	Show notification count or badge on application launch icon for huawei phones.
android.permission.READ_APP_BADGE	normal	show app notification	Allows an application to show app icon badges.
com.oppo.launcher.permission.READ_SETTINGS	normal	show notification count on app	Show notification count or badge on application launch icon for oppo phones.
com.oppo.launcher.permission.WRITE_SETTINGS	normal	show notification count on app	Show notification count or badge on application launch icon for oppo phones.
me.everything.badger.permission.BADGE_COUNT_READ	unknown	Unknown permission	Unknown permission from android reference
me.everything.badger.permission.BADGE_COUNT_WRITE	unknown	Unknown permission	Unknown permission from android reference

NETWORK SECURITY

NO	SCOPE	SEVERITY	DESCRIPTION
----	-------	----------	-------------

CERTIFICATE ANALYSIS

HIGH: 0 | WARNING: 2 | INFO: 1

TITLE	SEVERITY	DESCRIPTION
Signed Application	info	Application is signed with a code signing certificate
Application vulnerable to Janus Vulnerability	warning	Application is signed with v1 signature scheme, making it vulnerable to Janus vulnerability on Android 5.0-8.0, if signed only with v1 signature scheme. Applications running on Android 5.0-7.0 signed with v1, and v2/v3 scheme is also vulnerable.
Certificate algorithm might be vulnerable to hash collision	warning	Application is signed with SHA1withRSA. SHA1 hash algorithm is known to have collision issues. The manifest file indicates SHA256withRSA is in use.

MANIFEST ANALYSIS

HIGH: 4 | WARNING: 9 | INFO: 0 | SUPPRESSED: 0

NO	ISSUE	SEVERITY	DESCRIPTION
1	App can be installed on a vulnerable upatched Android version Android 5.0-5.0.2, [minSdk=21]	high	This application can be installed on an older version of android that has multiple unfixed vulnerabilities. These devices won't receive reasonable security updates from Google. Support an Android version => 10, API 29 to receive reasonable security updates.

NO	ISSUE	SEVERITY	DESCRIPTION
2	Activity (com.grppl.android.shell.halifax.yiM) is not Protected. An intent-filter exists.	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. The presence of intent-filter indicates that the Activity is explicitly exported.
3	App Link assetlinks.json file not found [android:name=com.grppl.android.shell.halifax.WaM] [android:host=https://halifax-online.co.uk]	high	App Link asset verification URL (https://halifax-online.co.uk/.well-known/assetlinks.json) not found or configured incorrectly. (Status Code: 302). App Links allow users to redirect from a web URL/email to the mobile app. If this file is missing or incorrectly configured for the App Link host/domain, a malicious app can hijack such URLs. This may lead to phishing attacks, leak sensitive data in the URI, such as PII, OAuth tokens, magic link/password reset tokens and more. You must verify the App Link domain by hosting the assetlinks.json file and enabling verification via [android:autoVerify="true"] in the Activity intent-filter.
4	Activity (com.grppl.android.shell.halifax.WaM) is not Protected. An intent-filter exists.	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. The presence of intent-filter indicates that the Activity is explicitly exported.
5	Activity (com.grppl.android.shell.halifax.NOM) is vulnerable to StrandHogg 2.0	high	Activity is found to be vulnerable to StrandHogg 2.0 task hijacking vulnerability. When vulnerable, it is possible for other applications to place a malicious activity on top of the activity stack of the vulnerable application. This makes the application an easy target for phishing attacks. The vulnerability can be remediated by setting the launch mode attribute to "singleInstance" and by setting an empty taskAffinity (taskAffinity=""). You can also update the target SDK version (28) of the app to 29 or higher to fix this issue at platform level.
6	Activity (com.grppl.android.shell.halifax.NOM) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

NO	ISSUE	SEVERITY	DESCRIPTION
7	Activity-Alias (com.halifax.halifax.GrappleActivity) is not Protected. An intent-filter exists.	warning	An Activity-Alias is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. The presence of intent-filter indicates that the Activity-Alias is explicitly exported.
8	Service (com.google.firebase.messaging.FirebaseMessagingService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.
9	Broadcast Receiver (com.google.android.gms.measurement.AppMeasurementInstallReferrerReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: android.permission.INSTALL_PACKAGES [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
10	Broadcast Receiver (com.google.firebase.iid.FirebaseInstanceIdReceiver) is Protected by a permission, but the protection level of the permission should be checked. Permission: com.google.android.c2dm.permission.SEND [android:exported=true]	warning	A Broadcast Receiver is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device. It is protected by a permission which is not defined in the analysed application. As a result, the protection level of the permission should be checked where it is defined. If it is set to normal or dangerous, a malicious application can request and obtain the permission and interact with the component. If it is set to signature, only applications signed with the same certificate can obtain the permission.
11	Service (com.google.firebase.iid.FirebaseInstanceIdService) is not Protected. [android:exported=true]	warning	A Service is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

NO	ISSUE	SEVERITY	DESCRIPTION
12	Activity (com.grppl.android.shell.halifax.VYt) is vulnerable to StrandHogg 2.0	high	Activity is found to be vulnerable to StrandHogg 2.0 task hijacking vulnerability. When vulnerable, it is possible for other applications to place a malicious activity on top of the activity stack of the vulnerable application. This makes the application an easy target for phishing attacks. The vulnerability can be remediated by setting the launch mode attribute to "singleInstance" and by setting an empty taskAffinity (taskAffinity=""). You can also update the target SDK version (28) of the app to 29 or higher to fix this issue at platform level.
13	Activity (com.grppl.android.shell.halifax.VYt) is not Protected. [android:exported=true]	warning	An Activity is found to be shared with other apps on the device therefore leaving it accessible to any other application on the device.

PLAYSTORE INFORMATION

Title: Halifax Mobile Banking

Score: 4.29 **Installs:** 5,000,000+ **Price:** 0 **Android Version Support:** **Category:** Finance **Play Store URL:** com.grppl.android.shell.halifax

Developer Details: Lloyds Banking Group PLC, Lloyds+Banking+Group+PLC, None, <http://www.halifax.co.uk/app>, mobileapps@lloydsbanking.com,

Release Date: May 25, 2016 **Privacy Policy:** [Privacy link](#)

Description:

The Halifax Mobile Banking app can do everything you'd expect, maybe a little extra. And you can use it whenever and wherever you want. So you can crack on if you're on the bus, at work or simply can't tear yourself away from the telly. THE BASICS - Sign in quickly and securely with your fingerprints or a 3-character combination from your memorable information - Swipe easily to see balances and statements on your Halifax accounts - View details of individual transactions - Check money coming in and going out -Get your Travel Money

delivered for free to your home or local branch - Make transfers and payments - Manage your standing orders and view direct debits - Pay your loan or credit card bill - Pay in cheques - Set up new payees or pay your phone contacts. A FEW EXTRAS - Earn as you spend with Cashback Extras - Apply for loans, savings, cards and more - Call us safely from the app – we'll already know it's you so can quickly connect you without the usual security checks. STAY SAFE- Freeze card transactions if you've temporarily misplaced your debit card or want to restrict how it's used - Report lost or stolen cards - Order replacement cards and PINs - Reset your Online Banking password - Update the contact details we have for you. GETTING STARTED New to this app? No problem. Just register your device and you're ready to go. For this you'll need: - An up-to-date phone number registered with us - Halifax UK personal account - Online Banking username, password and memorable information (you can create these in the app) - A device that isn't rooted. KEEPING YOU SAFE ONLINE We do all we can to protect you online. We also have an online banking guarantee: <http://www.halifax.co.uk/aboutonline/security/> CONTACTING YOU We won't contact you any more than normal if you use the app. But please stay alert to email, text messages or phone calls that appear to be from us. Criminals may try to trick you into giving them sensitive personal or account information. We'll never contact you to ask for these details. Any emails from us will always greet you personally using your title and surname and either the last 4 digits of your account number or the last part of your postcode '*** 1AB'. Any text messages we send you will come from Halifax . IMPORTANT INFORMATION Mobile Banking is available to our Online Banking customers with a UK personal account. Services may be affected by phone signal and functionality. Terms and conditions apply. You must not download, install, use or distribute our Mobile Banking apps in the following countries: North Korea; Syria; Sudan; Iran; Cuba and any other country subject to UK, US or EU technology export prohibitions. Please note that features that require the use of your device's phone capability, such as Call us, won't work on tablets. When you use this app we collect anonymous location data to help combat fraud, fix bugs and improve future services. Cashback Extras is available to Halifax bank account customers (excluding Basic Account holders) aged 18+ with a debit/credit card who bank online. Terms and conditions apply. Fingerprint Sign-in requires a compatible mobile running Android 7.0 or higher and may not currently work on some tablets. Save the Change® is a registered trademark of Lloyds Bank plc and is used under licence by Bank of Scotland plc. Halifax is a division of Bank of Scotland plc. This app and Mobile Banking are operated by Bank of Scotland plc (registered in Scotland (No. SC327000) Registered office: The Mound, Edinburgh, EH1 1YZ). Authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.
